

# Knowledge Management

Approach for Utilization of Funds

---

# Safety Training Packs

- Hire a retired individual to develop Safety Training packs, posted on Omnipress website
  - Goal: Consolidate safety knowledge base for effective sharing with industry
  - Funds will be used as token compensation
  - Collect and add knowledge from EPC archive, open literature, and solicitation from member companies
  - Use individual's background and knowledge to extend knowledge base, highlight potential hazards / risk areas, and summarize common hazard management strategies

# Safety Training Packs

- The Training Packs can be structured in Topical manner or based on Plant Sections
  - Examples of Topical Areas
    - Cold/Auto-Refrigeration Safety
    - Exothermic Reactors
    - Self Heating
    - NOx Safety, etc.
  - Examples of Plant Sections
    - Cracking Furnaces
    - Acetylene Reactors
    - Equipment opening / preparation, etc.
- Training packs will have customary legal disclaimers

# Path Forward

- Main Committee's alignment
- Prepare preliminary list of individuals and Topics/Plant Sections
  - Support/involvement from EPC and Safety Subcommittee
- Address administrative issues (copyright, web hosting, etc.)
- Approach individuals for their interest and level of compensation
- Bring proposal back to Main Committee for approval
- Proceed with Pilot Training Pack before developing rest of the packs
