**“Ethics and Your Engineering Responsibility”**

Scheduled Speaker:

**Peter Sibilski, P.E. FAIChE – Plant Manager  
 Pharmetic Manufacturing Co., LLC**

Ethics is an important part of our regular work as engineers, and licensed engineers are required to complete at least 2 hours of training in ethics every two years; yet few universities require engineering students to attend a formal ethics course. Via discussion of case studies, attendees of this presentation will be introduced to the concept of ethics, the warning signs of a potential ethical problem and how it can affect your career, and steps you can take to protect your professional integrity.

Peter Sibilski has over 30 years of experience in project management, product development, and energy management in the process-chemical and pharmaceuticals industries. He has led diverse, cross-functional teams in achieving business-driven goals for projects of significant dollar value. Peter has a proven track-record of successful and award-winning product development and project implementation providing significant cost savings, increased operational efficiencies, and enhanced competitive position. He received his BSChE in 1981 from New Jersey Institute of Technology, and has an MBA – Technology Management from The University of Phoenix. Peter is a licensed PE in New Jersey, and is also a Certified Energy Manager (CEM).
