

Hydraulic design of micro-miniature heavy-lift vehicles: How do insects "wing it" ?

Insect wings as living systems: flows, structure, and function

Mary Salcedo

What: Talk by NSF post-doctoral research fellow Mary Salcedo

When: May 5, 2021 @ 12:00 PM

Where: WebEx – contact smithbh@corning.com

Twin Tiers Local Chapter
AIChE

Join us to learn about how insect wing vein structure functions as a hydraulic system, which can be modeled and inspire biomimetic microfluidic devices
