

COMMERCIALIZING INDUSTRIAL BIOTECHNOLOGY

May 13-15, 2025

MIT Samberg Conference Center | Cambridge, MA

Discover the Global Impact of Industrial Biotechnology

The event spotlights best practices, lessons learned, and technology innovations for accelerating commercial production of bio-based products. This is the premier conference focused on scale-up and commercialization of new products in the synthetic biology, fermentation products, and industrial biotechnology space.

SESSION TOPICS

- Building the Bioeconomy: Partnerships with Investors, Educators and Government
- Technology Translation from Academia to Industry
- Biomanufacturing (Commodity) Chemicals: What is Achievable?
- Navigating the Contract Manufacturing Network
- Building Biomanufacturing at Commercial Scale
- Emerging Technologies to Accelerate RD&D
- Biomanufacturing with Non-Model Systems
- Start-up Showcase

KEYNOTE SPEAKERS

Sarah Glaven, *U.S. Naval Research Laboratory*

Jason Kelly, *Ginkgo Bioworks*

Ajikumar Parayil, *Manus*

Kristala L. J. Prather, *Massachusetts Institute of Technology*

CONFERENCE CHAIRS

Christine Santos, *Manus*

Jason Ryder, *Oobli and University of California, Berkeley*

ORGANIZING COMMITTEE

Kirsten Benjamin, *Pivot Bio*

Bo Chen, *Geno*

Brian Davidson, *Oak Ridge National Laboratory*

Emily Greenhagen, *Ginkgo Bioworks*

Olivier Rolland, *L'Oréal*
