

Epigenetics & Bioengineering Conference

SEPTEMBER 12-14, 2019
Hotel Barcelona Center
Barcelona, Spain
www.aidhe.org/epibio

The **2019 Epigenetics and Bioengineering Conference (EpiBio)** explores how to advance interfaces with the epigenome, providing a platform to communicate, share technical knowledge, nucleate collaborations and partnerships, and hear a diverse set of perspectives related to needs, opportunities and priorities at the intersection of bioengineering and epigenetics. The meeting will present a unique combination of excellent basic molecular epigenome research and engineering applications of epigenome editing.

SESSION TOPICS

- Sensing Epigenetic Modifications
- Writing Epigenetic Modifications
- Nuclear Organization
- Epigenetic Diagnostics and Therapeutics
- Single Cell Epigenetics
- Computation and Modelling in Epigenetics

KEYNOTE SPEAKERS

Luciano Di Croce
CRG - Center for Genomic Regulation

Charles Gersbach
Duke University

Dave Segal
University of California, Davis

CONFERENCE CHAIRS

Albert Jeltsch
University of Stuttgart

Marianne Rots
University of Groningen

ORGANIZING COMMITTEE

Lacra Bintu
Stanford University

Nathaniel Hathaway
University of North Carolina Chapel Hill

Karmella Haynes
Emory University

Albert Keung
North Carolina State University

Ahmad (Mo) Khalil
Boston University

Caudio Mussolino
University of Freiburg

Hennriette O'Geen
University of California Davis

Dave Segal
University of California Davis

Hadley Sikes
Massachusetts Institute of Technology

Philipp Voigt
University of Edinburgh

Elisabeth Zeisberg
University of Goettingen
