Scan the QR Code to view more information on the SPTC website.

FEATURED SESSIONS

Career Development Presentations:

A panel of chemical engineers and researchers discuss their backgrounds, motivation, and career paths including their day-to-day challenges from their various work experiences.

Industry Panel Q&A Session:

This session will allow students to ask the panel about career motivation and potential career outlook.

Speed Mentoring Session:

In this timed event, students will speak with seasoned engineers about their various industry and career paths as well as share their personal insights on career opportunities. But don't get too comfortable! This is speed mentoring, and students must move at the sound of the buzzer.

Exhibit Hall/Recruitment Fair:

This session will provide opportunities for students to visit the booths of industry and university representatives to seek information about enrollment, graduate school, summer internships, or full-time positions.
