

2012 AIChE Ammonia Safety Symposium Roundtable Session Program

Thursday, September 13th • 8:30 AM – 12:00 PM

The Roundtable meeting provides informal and interactive sharing of common problems and incidents with fellow producers and industry experts. The participation of the audience with questions and answers is critical to the Roundtable's success.

The Roundtable is an informal session meant to generate open communication. It is not a recorded session. Any notes from this session should be considered confidential and not distributed outside your organization.

This year's Roundtable session will address topics related to ammonia plant operational safety with special attention to catalyst issues and mechanical integrity of equipment.

Welcome and Opening Remarks	
Session 1	Catalyst Operational Issues Three short presentations on common catalyst issues to generate a two-way discussion between audience and expert panel.
Break	
Session 2	Mechanical Integrity A panel of four production company experts will lead a dialogue on one of the leading issues with process safety in ammonia plants.
Session 3	Fire Incidents <ul style="list-style-type: none">• Agrium• GrowHow UK
Closing Remarks
