

2020 Chem-E-Car Video Competition Instructions

Build excitement for your participation in the Annual Student Conference Chem-E-Car competition by submitting a quick intro video, profiling your team, your car and your participation in the competition. **The focus of the video should be explaining the Chem-E-Car design and what makes your car unique.**

This video will be posted to ChEnected, the AIChE student page, shown on the ChEnected YouTube Channel, tweeted, and shown on Facebook. The video will also be broadcasted during the 1 hour countdown at the Competition in Orlando.

After all of the Chem-E-Car Team Videos are posted on youtube, all teams will have the opportunity to cast their vote for the favorite video. Please note that each team cannot vote for themselves in the video competition. Also, to make sure we get all the votes in, if the team does not submit a vote, they will be ineligible to win the award.

Instructions:

- Video should be no longer than **60 seconds**
- Video should be a quick, fun introduction to your car, your team and your school. What makes your car special? **The focus of the video should be explaining the Chem-E-Car design and what makes your car unique.**
- Video must show your school and car name
- Video must be submitted by **November 6th, 2020**. The earlier the better so we can start featuring these online!
- Video should be submitted in an .mp4 YouTube-friendly format.
- Please email studentchapters@aiiche.org if you need instructions uploading your video.

Pay Special Attention:

- Videos submitted must comply with Youtube copyright policies.
- DO NOT USE music or video purchased for your personal collection or taken from other videos online
- DO NOT USE photos grabbed from Google Images
- You can use [music from creative commons](#) provided you follow proper attributions. See 2nd page for instructions.

If you submit a video that does not follow what is outlined above, it cannot be used or considered for the competition.

Here are the Chem-E-Car Spotlight Videos from 2018 to give you an idea of what teams have done in the past:

[Instructions for Searching for Music on Creative Commons](#)

1. Go to <http://search.creativecommons.org>
2. Rather than search a specific known artist's name, it's better to search a type of music like "surf music", "loungue music", "punk", etc. and click on either Soundcloud or Jamendo.
3. Within the actual video, they could link to the artist's webpage and credit them in the video.
4. Soundcloud doesn't have an option for "non-commercial use". With this being the case, I would opt for "To modify Commercially in the search".

How can I find sounds licensed under Creative Commons?

We recently released advanced search features that let you select to search under CC parameters. To search for Creative Commons tracks, perform a basic search on SoundCloud, and then filter the results by Tracks only. Then, filter the results again so that you can find tracks to use or modify commercially:

The screenshot shows the SoundCloud search interface. Under the 'Filter results' section, the 'To use commercially' option is selected and highlighted with a red box. Other options include 'To modify commercially', 'To use commercially', 'To share', and 'To listen to'. Below the filters, there are tags for various music genres like Blues, Rock, Jazz, Blues rock, Acoustic, Folk, Hip hop, Country, and Pop.

How do I use tracks licensed under Creative Commons?

You can use tracks that you find on SoundCloud according to the terms provided in the license. All Creative Commons licenses require at least attribution, which means you must give credit to the original author. (A link to the track's page on SoundCloud is recommended as well).

- ▶ Tracks that are licensed with a Non-Commercial term means that they can only be used in a non-commercial setting
- ▶ A No-Derivatives term means that you can't create any work that is based on or incorporates the original work
- ▶ Share-Alike term means that you must release any work that uses the original under exactly the same license.

If you follow the terms of the Creative Commons license, you do not have to ask for permission from the original creator – in fact, that's the whole point – but many creators like to see and share projects that use their work.

5. Here is what the instructions say on Jamedo:

The image shows the Creative Commons Attribution-ShareAlike (CC BY SA) license logo, which consists of the CC logo, a person icon (BY), and a circular arrow icon (SA). Below the logo, the text reads: "You can copy, distribute, advertise and play this track as long as you:" followed by two bullet points: "Give credit to the artist" and "Distribute all derivative works under the same license".
