IPSW Day – 1	IPS	IPSW Day – 2		ay – 3	IPSW Day – 4	IPSW Day – 5
Remembering Seminal Events & Learning	Europear	European Way of doing Process Safety		r interview ergies	ONR culture survey	Review of Probability Basics
Lessons learned via the Loss Prevention Bulletin – 50 years of		CSB Panel		Analysis Methods S guidelines	Process Safety Fundamentals	Understanding management systems – a university students perspective
publications		Senior Leader Interview - BP		5 guideillies	Senior Leaders Interviews	
Historical review of explosion research and incidents		Step change for safety barrier assurance videos		rs interview Chevron	Advances in structural design against fires & explosions	Hazard screening using RAST/CHEF and OBRA
Calendar process safety incident	s, Seni	Senior leader interview Shell		culture change	Evaluation of Human Error Probability in Responding to Alarms	Evaluating and Protecting Liquids That Burn
Process Safety Education	Unders	Understanding the Canadian Standard		s process safety	PS Education – CCPS Tutorial	Chemicals Hazards Analysis
To Err is Human, to Forget is Disastrous	the contract of the contract o		CPI Senior Leaders view - How they drive Process Safety		Empowering PS Hazard Awareness and Learning in Energy Operations	Application of Dynamic Rik Analysis as tool for safer Digitalization
Effective learning from incident		Progress in Understanding Process Safety Culture -No More, No Less		nd fire modeling	Digitalization	Senior Leaders Interviews
	Safety Cu			oking back	Leak detection early warning	Management of battery hazards
Nimrod video	Impro	Improving Process Safety Knowledge		Distribution and isk Analysis	Process Safety views from Mining Leaders	Process Safety and the Energy Transition
Research into deflagration to detonation transition (DDT)		Lessons in good design – OPERA risk engineers		ince in Process ety	Supercharge your HAZOP	Energy Transition
Safety together barrier videos	Chemic	Chemicals Hazards Analysis		Process Safety	Research in the explosion and blast	Process safety and the energy transition
CCPS Global Summit Mumbai		Elements of Risk, Uncertainty and Risk Analysis		P Stats	Validation of the health of critical safeguards	Artificial Intelligence in Process Safety
Highlights - 1				luman Factors		
CCPS EPSC IChemESC FABIG MKOPSC IPSW Five-Day Program – 2 <sup>nd</sup> to 6 <sup>th</sup> Dec 202						

Join us virtually on the First Week of December for a week-long process safety learning and advancement!

Registration is now open!
