AIChE Career Fairs and Conferences: The Best Way to Find Chemical Engineers to Fill Those Open Slots

When you recruit at AIChE Career Fairs and Conferences you reach:

- Qualified chemical engineers with degrees from accredited institutions
- Experienced prospects whose experience ranges from academia to government to industry
- Committed professionals dedicated to professional excellence and ongoing skill development

You'll find candidates who meet your job specs with much less effort.

Choose the mode that best meets your needs:

Online — Avoid disruption to your schedule while posting jobs, searching résumés, scheduling interviews and screening candidates. Scheduled just prior to AIChE Meetings so you can arrange in-person follow-up meetings.

Onsite — Meet motivated candidates in two venues: undergraduate students nearing graduation as well as graduate students and more experienced R&D professionals.

The AIChE Student Conference Recruitment Fair puts you in front of high-performing engineering students eager to start their careers. The Annual Meeting delivers professionals and graduate students steeped in the latest R&D. And because you'll be located among the general exhibitors you'll get extra foot traffic. Plus, the opening reception, networking dinners and evening social hours provide additional opportunities for you to meet and interact with candidates.

You can participate in either mode separately or take advantage of package pricing and appear in both to maximize your contact with prospects.

Whichever choice you make will be budget-friendly.

- Online participation requires no travel and reaches a global audience.
- The onsite format allows table-top displays that require fewer staff than traditional pipe and drape booths. Displays that fit on 6-foot tables are permitted.

Plus, when you participate in multiple events you save money — making your budget go further.
